SUPPLYING YOUR ARTWORK IN THE CORRECT FILE FORMAT

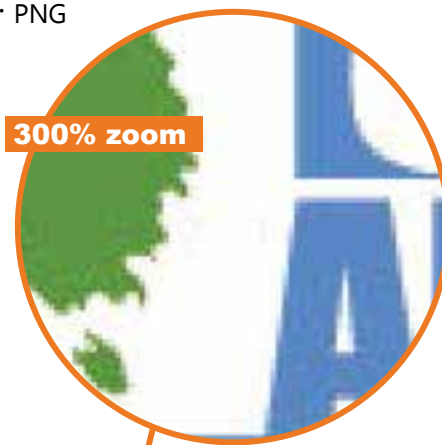

VECTOR ARTWORK

- AI
- EPS

RASTERISED ARTWORK

- JPEG
- GIF
- PNG

WHAT IS A VECTORISED FILE?

A vectorised logo is a vector file that with clean, crisp, corners and smooth curves that can be changed to any size without any loss of quality - Meaning no more pixelated edges on your logo.

WHY SHOULD YOU HAVE YOUR FILE IN VECTOR FORMAT?

We can manipulate it better and it can be scaled to fit large areas without losing quality

We can separate it from the background and pull apart elements

The colors can be set up to be printed consistently from any commercial printer

It can be created in outlines so the font never loads differently
