

# Sunranger Umbrella Ground Stake

## Installation Guide

**ALWAYS CHECK FOR UNDERGROUND SERVICES BEFORE USE.**

**PRODUCT USAGE WARNING - DANGER, DO NOT USE THIS ITEM UNLESS YOU HAVE CHECKED THE LOCATION OF UNDERGROUND SERVICES. FAILURE TO DO THIS COULD RESULT IN SEVERE INJURY INCLUDING DEATH, OR DAMAGE TO SERVICES.**

The Sunranger Ground Stake is a useful tool for supporting market umbrellas in lawns or other soft substrates for temporary events. They are not designed for permanent installations.

### Important Notes:

- For temporary use only.
- Not suitable for windy conditions.
- Never leave in-situ when umbrella is removed. This could cause a trip hazard.

### Steps:

1. Once you have determined that there are no pipes, cables or other underground services in the area, use a heavy mallet to drive the Ground Stake into the earth. Typically, the Ground Stake should be hammered into the ground to a depth of approx. 40cm.
2. Insert the umbrella and tighten the side screws
